Peoples Gas and North Shore Gas Energy Efficiency Programs
Trade Ally Network

Subject: 2026-2029 Energy Efficiency Programs

Dear Trade Ally:

We are pleased to share with you that our Energy Efficiency Plans¹ for the period of Jan. 1, 2026 through Dec. 31, 2029 have been approved by the Illinois Commerce Commission.

Throughout this next plan period, we will continue to have programs and budgets available to support our customers with tried-and-true energy-saving opportunities, and we look forward to working with you to deepen customers' energy savings with the addition of exciting new technologies. For those of you that haven't participated in our new technology trainings, such as [gas heat pumps](#) and [micro combined heat and power](#) (mCHP), we encourage you to reach out to your [program representative](#) to sign-up for future trainings. You can also check out the recordings on [TradeAllyCenter.com](#).

We are proud of our collective achievements, made possible through your efforts. Since 2011, we have provided **over \$183M in incentives** to fund more than **1.2M energy-saving customer projects**, which adds up to big impacts! More than **160M therms have been saved** which equates to **removing over 198,000 cars** from the road or **offsetting the energy use of over 114,000 homes** for one year.

Thank you for your hard work in helping to achieve these significant results for our customers!

As our Energy Efficiency Programs look to the future, we are excited to continue our work together, helping customers save energy, and driving energy efficiency innovation. Stay tuned for more program-specific information coming this fall.

Sincerely,

Christina Frank
Director, Energy Efficiency and C&I Customer Strategy
Peoples Gas and North Shore Gas
